

IRO Certificate #4599

NOTICE OF INDEPENDENT REVIEW DECISION

November 1, 2002

Re: IRO Case # M2-02-0928-01

Texas Worker's Compensation Commission:

___ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IROs, TWCC assigned this case to ___ for an independent review. ___ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, ___ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Anesthesiology and Pain Managment. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to ___ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the ___ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

The patient has chronic neck pain which has been unresponsive to physical therapy, injections and medications. There are reports that the patient reported decreased pain with an RS4 unit. An MRI of the cervical spine shows multilevel disk protrusions.

Requested Service

Purchase of an RS4i Sequential Stimulator

Decision

I agree with the carrier's decision to deny the requested purchase of RS4 unit.

Rationale

The medical records provided for review indicate that the patient's pain levels have not dropped off after RS4 use. No objective evidence was provided of pain relief after RS4 use.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.
